Highlights of caArray 2.3.1 released on 2/2/2010

The release notes can be found at
https://cabig-kc.nci.nih.govhttps://cabig-kc.nci.nih.gov/Molecular/uploaded_files//5/5f/Caarray_release_notes_2_3_1

- This release represents a feature release of the caArray 2 software. Highlights of caArray 2.3.1 are:

    ♦ Export to GEO: Affymetrix single-channel CHP experiments
    ♦ 17972: Allow deletion of already imported but not parsed data files
- A production version of caArray 2.3.0 is available on the NCI CBIIT production server: array.nci.nih.gov.
